

DemoQA Automation Practice Form Testing					
#	Scenario	Steps	Expectation	Outcome	Observations
1	Submit first student dataset	1. Navigate to https://demoqa.com/automation-practice-form . 2. Fill up the form fields using the values in the first student dataset. 3. Click the Submit button to submit the form. 4. Verify successful submission by checking that the values in the confirmation model matches the submitted dataset.	Test passes with successful dataset submission	Test passes with successful dataset submission	Banner advertisements may interfere with click interactions as they could potentially overlap button elements. This issue is mitigated by increasing the viewport size, scrolling the form to the top of the page, and setting force property to true for click actions.
2	Submit second student dataset with invalid hobby "Traveling"	1. Navigate to https://demoqa.com/automation-practice-form . 2. Fill up the form fields using the values in the first student dataset. 3. Throw error when trying to select 'Traveling' hobby checkbox.	Test passes with failed dataset submission	Test passes with failed dataset submission	The form submission fails expectedly as it tries to check a "Traveling" checkbox for hobby, which does not exist.
3	Submit second student dataset after removing "Traveling" hobby	1. Programmatically remove "Traveling" hobby from dataset. 2. Navigate to https://demoqa.com/automation-practice-form . 3. Fill up the form fields using the values in the first student dataset. 4. Click the Submit button to submit the form. 5. Verify successful submission by checking that the values in the confirmation model matches the submitted dataset.	Dataset submits successfully	Dataset submitted successfully	N/A
